SKILLS

Programming Languages - Python, SQL

Data Bases: MS SQL Server, MySQL, Postgres

Data Analytical Tools: MS Excel, Power BI

Cloud Services - Microsoft Azure: Azure Data Factory, Azure SQLDB, ADLS Gen2, Azure Synapse Analytics, Azure Databricks, Microsoft Fabric, Snowflake, **AWS** (S3, Glue, Athena, Redshift)

Miscellaneous: ETL, DAX, Power Automate, Power Query, Data Modelling, Data Analysis, Dashboarding, Pandas

PROFESSIONAL EXPERIENCE

IMPERIAL BRANDS

Bangalore, IN

Power BI Developer / Data Analyst

March 2023 – Present

- Designed and developed interactive **Power BI** dashboards to deliver real-time reporting and strategic insights for cross-functional business teams.
- Applied advanced **SQL** techniques to clean, aggregate, and transform large datasets for operational and strategic analytics.
- Collaborated with analysts and stakeholders to establish documentation and governance practices, ensuring data consistency and privacy compliance.
- Integrated and transformed data from **SQL** On-premise, Flat files, and APIs into Azure ADLS Gen2 and **Azure SQL** DBs, supporting scalable analytics workflows and improving data model integrity.

INFOSYS LTD

Bangalore, IN

System Engineer / Data Analytics Engineer

June 2022 - Feb 2023

- Designed modular **ETL pipelines** using **Azure Data Factory & Databricks**, transforming raw input data into warehouse- ready structured data.
- Automated data processing tasks, boosting system efficiency and reducing manual effort by approximately 25%.
- Done exploratory data analysis using **SQL**, **Python**, to help product teams identify key behavioral trends and improve performance KPIs.
- Reported Insights to stakeholders meeting to help them taking decisions in improving the Business Profits.

E-Global Infotech

Bangalore, IN

Data Analytics Intern

Nov 2021 – April 2022

- Conducted data cleaning and preprocessing using **Power BI & SQL** to extract actionable insights for client use cases.
- Collaborated with product and engineering teams to develop impactful **Power BI** dashboards and reports aligned with business objectives.
- Documented processes and established reusable code snippets for workflow automation and data quality assurance.

PROJECTS

Tobacco Supply Chain Analytics (Azure, SQL, Power BI, Excel)

- Designed modular Power BI dashboards with integrated KPIs for self-service analytics and rapid decision-making.
- Performed SQL-based demand planning and trend analysis to improve inventory accuracy. Created DAX measures for dynamic filtering, time intelligence, and conditional formatting.
- Enabled self-service analytics by designing modular **Power BI** dashboards with integrated KPIs, empowering supply chain teams to monitor trends and make rapid decisions by implementing RLS through Roles.

Patient Analytics Infrastructure (Azure, Power BI, SQL, Excel)

- Developed Power BI dashboards to visualize patient trends, treatment outcomes, and operational metrics for healthcare teams.
- Validated and transformed historical patient data using SQL for accurate reporting and strategic analysis.
- Applied DAX and custom visuals to highlight anomalies, and support clinical decision-making.
- Collaborated with stakeholders to define KPIs and build self-service reports tailored to healthcare operations.

EDUCATION

PBR VISVODAYA INSTITUTE OF TECHNOLOGY & SCIENCE, JNTUA.

Master of Technology, Electrical and Electronics Engineering.

K AVALI, IN

Jan 2021
